CLOSING

EC 140 S
CLOSING UNIT

Technical Data

Dimensions:	Length:	approx. 2300 mm
	Width (incl. Spool for closure rolls):	approx. 1155 mm
	Working height:	approx. 1025 mm
Bag dimensions (filled)	Length:	max. 400 mm
	Width:	max. 180 mm
	Height:	max. 120 mm
	(other dimensions upon request)	
Capacity:	max. 45 packages / min (depending on the product)	
Power supply:	230/400 Volt / 50 Hz	
Power input:	0.8 kW	
Weight:	approx. 250 kg	

18 C

Available additional equipment:
> Hot foil printer ‚HPD' for labelling plastic clip tape
> Inclined belt conveyor
> Silent compressor
> Swivel mounted rest for tag printer

EC 140 S
Closing Unit

Machine specially designed for packaging bread rolls, crescent rolls, pretzels etc. in pre-manufactured plastic and paper bags. The equipment frame and all linings and covers are made of stainless steel – vital to long-term value and good for simple and hygienic cleaning. Castors and its compact construction make this closing unit flexible so that it can be used in most locations. The bag opening unit inflates the bag so that the product can be introduced easily and quickly by hand. At the downstream closing station, the product is sealed up precisely and reliably.

Non-binding suggested set-up drawing.

Multi-functional and ergonomic:
Bread roll hopper is removable for bagging sliced or whole loaves.

Optional: Revolving table
Collects closed-up products.

Optional: Inclined belt conveyor
Transports closed-up products back to the work table level.

Optional:
Silent compressor provides an independent compressed air supply.

Optional: Printing unit
Hot foil printer 'HPD' for labelling plastic clip tape.
